Meaning of the flaring arcs.  
They form the arced part of  $\int$  s-s.

is the power of the eternal becoming of the creativity of  $n b$ , the  $b$  periodic pattern (of light).

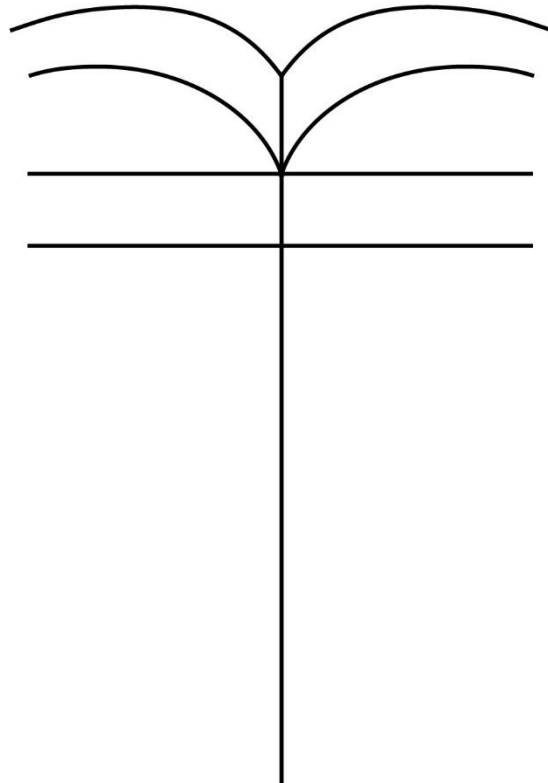

This sign is drawn in the transverse plane of the uatchet, and the entire sign is composed of the  $v$  sign and this arced periodic complex.

Then let these lines read  $n b$ , and let the entire complex sign read  $v n b$ ; and the function implied be that of  $v s-s n b t t$ .
